

AudioQuest's goal is the same today as it was from the start: ***Do No Harm!*** The signal is purest and least damaged at the source. When the source signal is honored and preserved, the listener is rewarded with great sound and music that inspires the soul; the viewer is rewarded with beautiful images and movies that thrill the mind and body.

Experience Mythical Creatures

The Mythical Creatures — ThunderBird, FireBird, and Dragon — are AudioQuest's best-sounding, most sonically transparent cables yet, establishing new benchmarks of clarity, realism, and musical pleasure. As one of AudioQuest's select Mythical Creatures partners, we are intimately familiar with the company's values and goals, fluent in its ideas and technologies, and well-equipped to present the full Mythical Creatures Experience in a world-class environment.

Schedule Your Mythical Experience

Speaker Cables

AudioQuest's Mythical Creatures are simply the most transparent, immersive speaker cables ever made. Employing ZERO-Tech for uncompressed current transfer and RF/ND-Tech for reduced transient intermodulation distortion to the connected power amplifier, these cables enable more of the natural detail, dynamic expression, and thrilling impact that brings music to life.

Analog Interconnects

AudioQuest's Mythical Creatures RCA and XLR interconnects enable more of the nuances that make music so engaging, moving, and human: more fully realized tonal expression, more low-level detail, more natural senses of body, breath, and touch.

Power Conditioners & Cables

With AudioQuest's flagship Niagara 7000 power conditioner and Mythical Creature AC power cables forming a fully optimized Noise-Dissipation System, music lovers can finally experience the clarity, dimensionality, frequency extension, dynamic contrast, and pure grip their A/V systems have been capable of delivering — if only the power had been right.

AudioQuest's *Do No Harm!* Philosophy

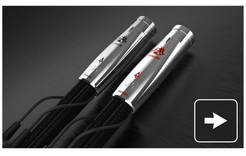

The audio/video signal is purest at the source.

Every component and cable in an audio/video system causes distortion, robbing the sound or picture of its ability to inspire and entertain. These aberrations add up like layers of dirty glass between you and the image you are trying to see. Better cables and components cannot improve the signals they carry. Performance can only be improved by minimizing the distortion of the original signal. AudioQuest products are meticulously designed to be like cleaner panes of glass, minimizing alteration or distortion of the original signal.

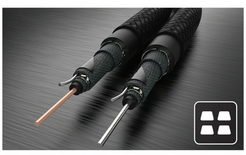

Solid Conductors

Unlike many cables that use stranded conductors, AudioQuest cables use solid conductors, which prevent strand-interaction, a significant source of distortion.

Direction-Controlled Conductors

A fundamental aspect of AudioQuest's Noise-Dissipation technology, Direction-Controlled Conductors ensure induced noise is dissipated and drained properly.

Metal Quality

AudioQuest uses high-purity conductor metals that have smoother surfaces and internal crystal structures to significantly reduce noise and distortion.

Noise-Dissipation

AudioQuest cables incorporate a hierarchy of materials and technologies designed to efficiently minimize and dissipate radio-frequency noise.
